The screenshot shows the Genesis Bots dashboard. The left sidebar contains navigation links: Dashboard, Genesis Wiki, News, Bots, Generate FP, Orders, Purchases, Payments, Tickets, Software, Profile, Initiator, and Logout. The main area is titled 'Bots' and includes a search bar and various filters. Below the filters, there are two tables: 'BOT NAME' and 'RESOURCES KNOWN / OTHER'. The 'BOT NAME' table lists bots with their names, dates installed, and last update times. The 'RESOURCES KNOWN / OTHER' table lists resources with their names, countries, and prices.

The screenshot shows the NightRanger system setup guide. The left sidebar contains navigation links: Dashboard, Campaign URLs, Proxy Groups, Sessions, Captured Data Log, Cookies Log, Notifications, and Guides. The main area is titled 'What i need to start using system?' and lists six steps: 1) Add your VPS, 2) Add your Domains, 3) Pick your Service form Services and Prices, 4) Create your Campaigns, 5) Hack your Victims, and 6) Inject Session Cookies to Your Browser. Below the steps, there is a section titled 'COMMON QUESTIONS ABOUT SYSTEM:' with a list of questions and answers.

What i need to start using system?

- 1) Add your VPS (You need cheapest Ubuntu or Debian Linux with min 10GB STORAGE)
You need VPS to connect as many domains as you want.
- 2) Add your Domains
- 3) Pick your Service form Services and Prices
You can use same domain with multi services.
- 4) Create your Campaigns
Campaigns are easily configured input links that you send to victims, they are also equipped with a botguard with a very flexible setting that shields you from all sorts of scanners and detections
- 5) Hack your Victims
- 6) Inject Session Cookies to Your Browser
Every time you visit a link, the system itself creates a unique cookie that identifies the visitor's session, and a cache of 10 minutes is also created. In this regard, all your tests run in the same session mode, and you may experience problems especially after successfully logging in to the test account. If you want to emulate the presence of multiple users always use an incognito tab (after closing it will clear all cookies) or just clear your tab's cookies.

COMMON QUESTIONS ABOUT SYSTEM:

- > What is man-in-the-middle reverse proxies?
- > Where can I buy VPS with crypto?
- > What happens after the subscription ends?
- > Why does it keep redirecting me to BotGuard URL?
- > Why constantly testing in the same Browser Tab is bad?
- > Why are my links turning red so fast?
- > How to register a domain so that it does not burn out fast?
- > Why i see error 444, 500, 502, 504?
